

DOMINION
TUBULAR LAMP COMPANY,

MANUFACTURERS

OF

Genuine Safety Tubular Lanterns,

STREET  SIDE LAMPS,

AND OTHER SPECIAL LINES OF

Reflecting, Station  Hand Lamps,

212 & 214 CRAIG STREET,

MONTREAL, P. Q., CANADA.

1887.

TO THE TRADE.

We improve this, our first opportunity of appearing in print, to thank our friends for the kind patronage extended us, in our endeavor to establish in their midst a manufacturing industry that would furnish them with an article of its kind superior to any manufactured in Canada or elsewhere. The success of our efforts has induced other manufacturers to place upon the market imitations of our Lanterns claiming the same superior advantages, but we wish here to most emphatically state, that we are the *first* and *only* manufacturers of *The Genuine Safety Tubular Lantern* in Canada.

We desire to call particular attention to our No. 3 Tubular Street Lamp, with automatic extinguisher, for illuminating streets, public parks, and all places where gas is not used. We are constantly adding to our line of Lamps and Lanterns a variety that will be found particularly suitable to the wants of the trade.

To merit a continuance of your kind favors is all we hope to attain.

Very Respectfully,

DOMINION TUBULAR LAMP CO.

MONTREAL, May 1st, 1887.

DOMINION TUBULAR LAMP COMPANY.

No. 0 Genuine Safety Tubular Lantern,
WITH GUARD.

No. 1 Burner, $\frac{1}{2}$ Inch Wick. 12 oz. Globe.

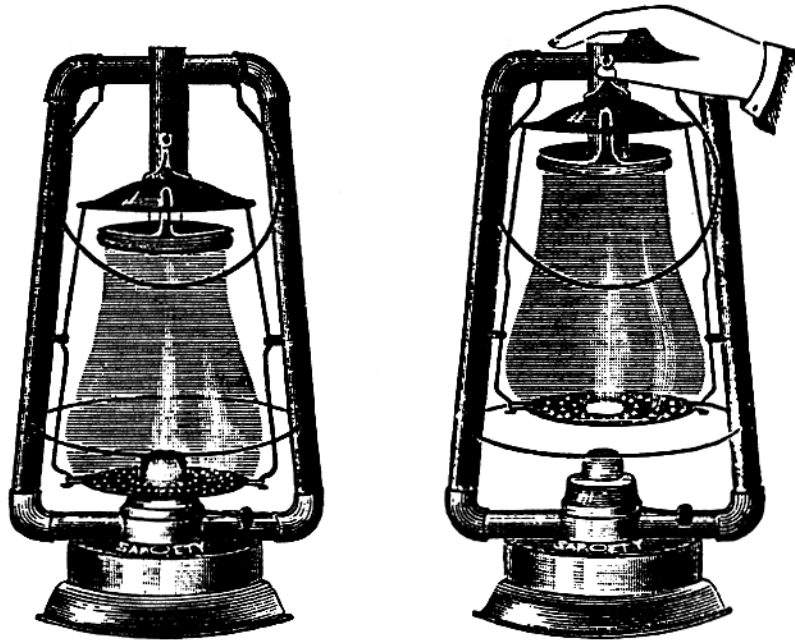

Is constructed on the Genuine Safety Tubular principle which utilizes all currents of air to brighten the flame, instead of extinguishing it, the latter being the fact with all IMITATIONS of our Safety Lantern for they are simply lanterns with tubes, and not Genuine Safety Tubular Lanterns, that CANNOT be extinguished by the wind.

In all Lanterns not having Our Safety Attachment the burner is only held in position by the globe which if removed or by accident broken, the burner falls out and the escaping oil ignites all with which it comes in contact, but with OUR SAFETY ATTACHMENT the burner is securely locked in the oil pot, making it at all times a positive SAFETY LANTERN.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of one dozen and half-dozen each.

DOMINION TUBULAR LAMP COMPANY

No. 0 Genuine Safety Tubular Lantern,
WITH GUARD.

No. 1 Burner, $\frac{5}{8}$ inch Wick, 12 oz. Globe.

The above illustrates the No. 0 Genuine Safety Tubular Lantern which we have been manufacturing for the past four years and with which the trade are thoroughly acquainted.

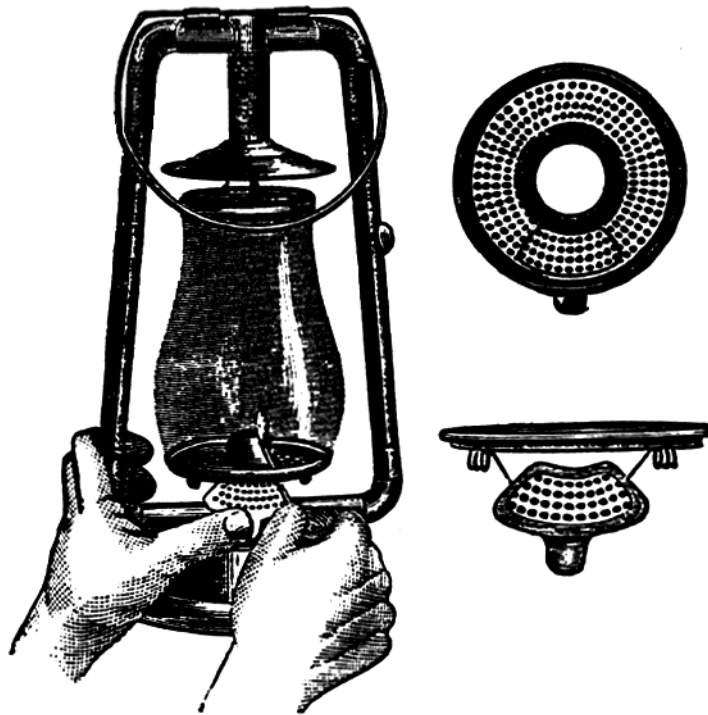

It is constructed on the true tubular principle, which causes all currents of air to feed the flame hence cannot be extinguished by the strongest wind.

It has our SAFETY ATTACHMENT which locks the burner securely in the oil pot, independent of the globe, hence is a positive Safety Lantern.

We use no solder in attaching the bails to our lanterns, hence they cannot be loosened by heat.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of one dozen and half dozen each.

No. 0 Spring Plate Tubular Lantern,
WITH GUARD.

No. 1 Burner, $\frac{1}{2}$ Inch Wick, 12 oz. Globe.

Is constructed on the true tubular principle, of the same material and workmanship, and has all the illuminating qualities of our GENUINE SAFETY TUBULAR LANTERN, but has not the SAFETY ATTACHMENT. It is better finished, a much cheaper and safer lantern than any of the imitations of our GENUINE SAFETY TUBULAR LANTERN. The aperture in the perforated plate, for easy lighting, is operated by means of a brass coiled wire, and as the plate is never heated, the wire does not lose temper, hence is perfectly durable.

This lantern cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of one dozen and half-dozen each.

DOMINION TUBULAR LAMP COMPANY

No. 1 Spring Plate Tubular Lantern,
WITH GUARD.

No. 2 Burner, 1 Inch Wick, No. 1 Globe.

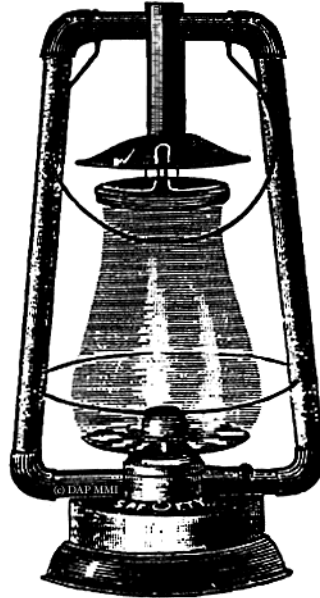

This Lantern possesses all the qualities of our No. O Spring Plate Tubular Lantern, but is constructed on a much larger plan, the oil pot containing nearly an imperial pint. The greater capacity of this lantern over the usual sizes particularly adapts it to the use of Mines, Mills, Wharfs, Steamboats and all places requiring a large light for many consecutive hours.

This Lantern cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of one dozen and half-dozen each.

DOMINION TUBULAR LAMP COMPANY

No. 0 Slotted Plate Tubular Lantern,
WITH GUARD.

No. 1 Burner, $\frac{5}{8}$ Inch Wick. 12 oz. Globe.

The Lantern represented in the above cut, is furnished with our new Slotted Plate, through which the wick can be reached at any point with a match and instantly lighted.

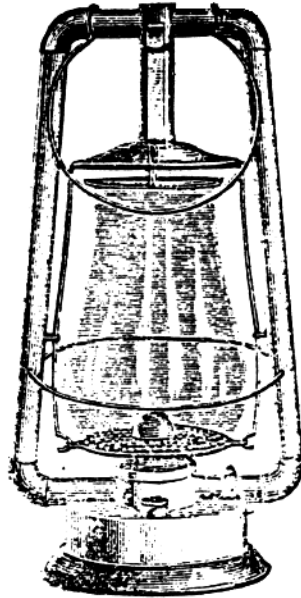

It is made of the same material as our No. 0 Genuine Safety Tubular Lantern, is furnished with the same burner, globe, and outside filler, and is far superior in every way to the many imitations of that lantern. at the same time it is the cheapest lantern in the market.

This Lantern cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished, without removing the globe.

Packed in cases of one dozen and half-dozen each.

DOMINION TUBULAR LAMP COMPANY

No. 0 Brass Genuine Safety Tubular Lantern,

WITH OR WITHOUT GUARDS.

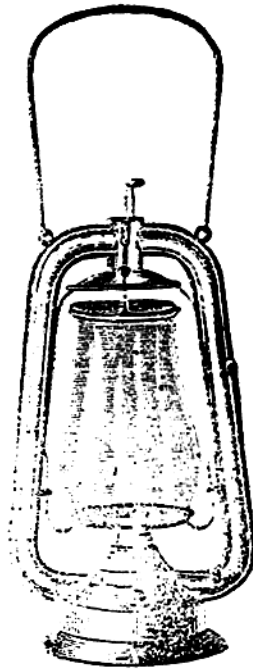

No. 1 Burner, $\frac{3}{4}$ Inch Wick, 12 oz. Globe.

This Lantern is in principle an exact duplicate and has all the illuminating powers of our No. 0 Genuine Safety Tubular Lantern. Is made in brass and finished in old gold, presenting a rich and attractive appearance, and makes as durable and handsome a Lantern as has ever been offered in this market.

This Lantern cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed as ordered.

DOMINION TUBULAR LAMP COMPANY.

No. 00 Brass Genuine Safety Tubular Lantern.

WITHOUT GUARD.

No. 0 Burner, $\frac{3}{8}$ Inch Wick. No. 00 Globe.

This Lantern is eleven inches in height, is constructed on the true tubular principle, is equal in finish, and has all the illuminating qualities of our No. 0 Safety Tubular Lantern.

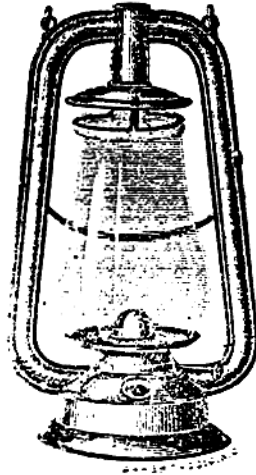

It is small and unique in design, and will be found much more convenient for some purposes than our larger lanterns.

It is the only small brass Lantern that is manufactured here, and is particularly adapted to the use of ladies and children, the feeder cap being furnished with a leather washer, to prevent the oil from coming in contact with the clothing.

Cannot be extinguished by the wind.

Can be filled lighted, regulated and extinguished without removing the globe.

DOMINION TUBULAR LAMP COMPANY.

No. 00 Regular Brass Tubular Lantern,

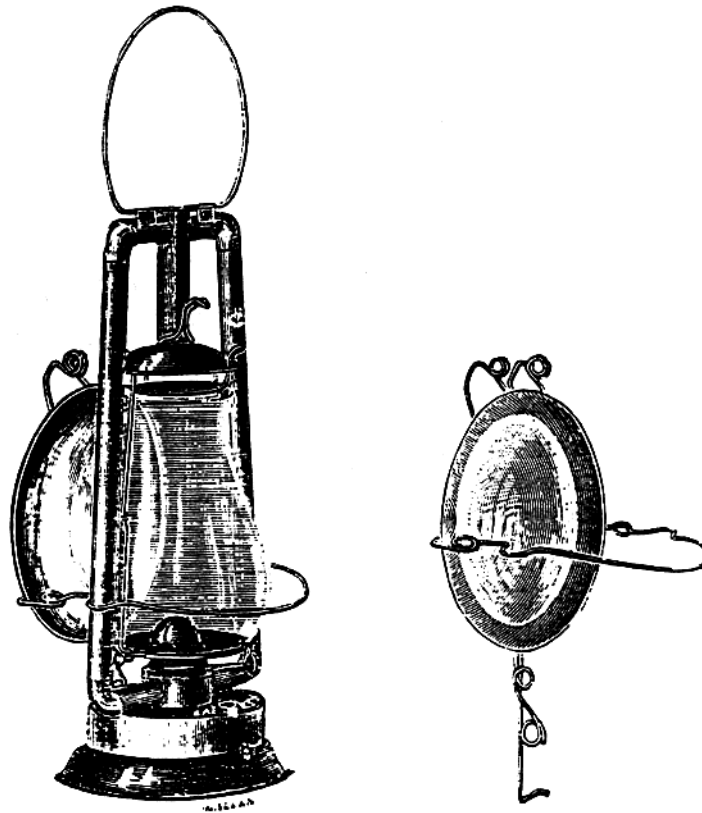

WITHOUT GUARD.

No. 0 Burner. $\frac{5}{8}$ Inch Wick, No. 00 Globe.

This Lantern is an exact duplicate of our No. 00 Brass Genuine Safety Tubular Lantern in regard to principles employed, illuminating powers, perfection of finish &c. &c., but has not the "SAFETY ATTACHMENT," and for this reason it is sold at a reduced figure.

Like all of our lanterns, it cannot be extinguished by strong currents of air.
Can be filled, lighted, regulated and extinguished without removing the globe.

DOMINION TUBULAR LAMP COMPANY.

No. 1 Patent Dash Board Attachment.

For No. O Genuine Safety Tubular Lantern.

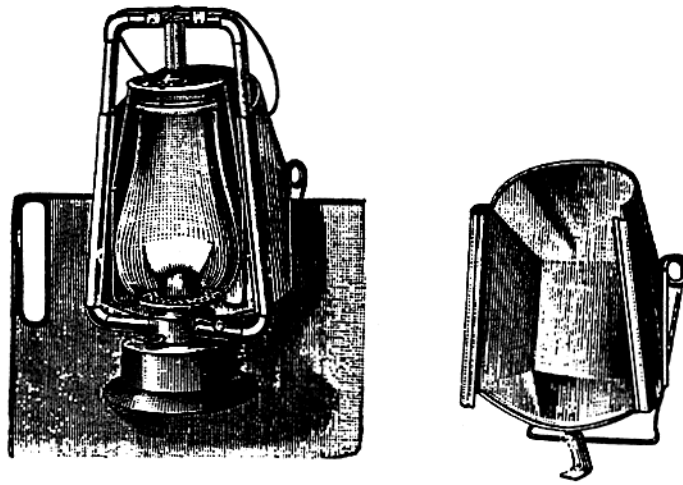

This is an ingenious arrangement of wire, which at once forms a guard to your lantern, holds the reflector in position, and can be instantly attached to, or detached from the lantern, and dash board.

It is made to fit the No. O Genuine Safety Tubular Lantern, and we recommend its use with none other, as they will not withstand slight currents of air or even the usual jar of your vehicle, without being extinguished.

It holds the lantern securely to the Dash Board, and does not require the removal of the globe in lighting, in fact is durable and complete, and when used in connection with our lanterns, we warrant it in every instance to give entire satisfaction.

Packed in cases of 2, 3, and 6 dozens each.

DOMINION TUBULAR LAMP COMPANY.

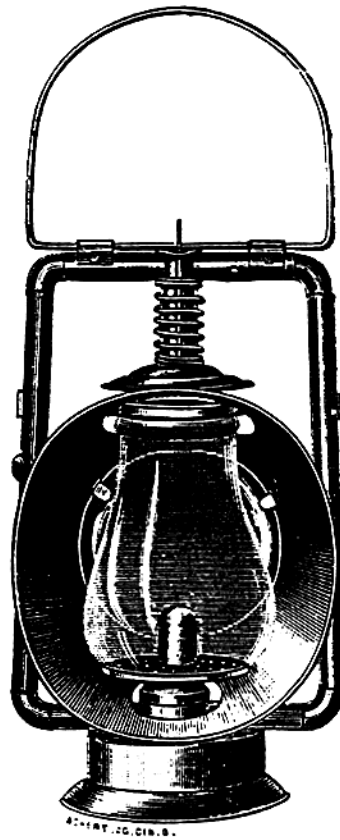

No. 2 Patent Dash Board Attachment.

The above illustrates our No. 2 Dash Board Attachment holding the lantern in position, and also detached.

It consists of a hood which encloses the back and sides of the lantern, and to which it is fastened by means of a hook at the bottom. The hood being a reflecting surface the back and side rays of light are forced directly in front, thus avoiding the blinding glare experienced in using any other attachment. It is made to fit the No. 0 Genuine Safety Tubular Lantern, and when used with it you have a clear bright light fastened securely to your Dash Board that cannot be extinguished by the wind or the jar of the vehicle.

Packed in cases of 2, 3, and 6 dozen each.

DOMINION TUBULAR LAMP COMPANY.

No. 0 Safety Tubular Hooded Reflector
Lantern,

WITH DASH BOARD ATTACHMENT.

**No. 1 Burner with long cone. $\frac{5}{8}$ inch Wick, No. 0 Globe and
5 Inch Silvered Glass Reflector.**

This is the most complete reflector lantern made. It is constructed upon the principle of a Locomotive head light, the rays of light being so focused that they are diffused directly from the centre of a 5 inch silvered glass reflector.

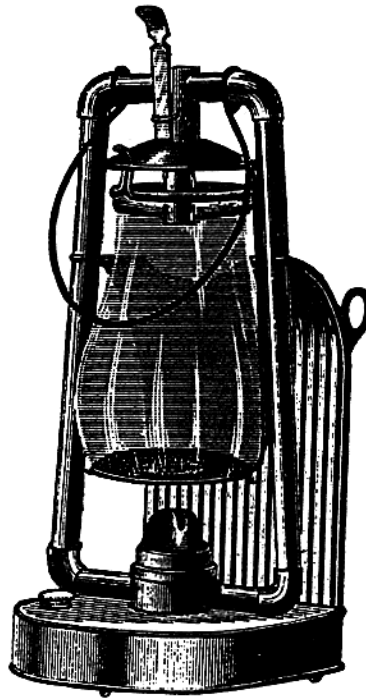

It is provided with our SAFETY ATTACHMENT for locking the burner securely to the oil pot when the globe is removed.

It has also our Dash Board Attachment spring, and for driving at night, for use in factories, mills, steamboats, stables, &c., it is unsurpassed.

Cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of half-dozen each.

DOMINION TUBULAR LAMP COMPANY.

No. 15 New Side and Dash Lamp and Lantern Combined.

No. 1 Burner, $\frac{5}{8}$ inch Wick. No. O Globe.

We wish to call particular attention to our New No. 15 Combination Lamp and Lantern, which although so recently introduced to the trade, has become a general favorite.

It is constructed on the Genuine Tubular Principle, has an extra large oil pot with a capacity for burning twenty-four hours, and by means of our SAFETY ATTACHMENT, the burner is locked securely in the lantern when the globe is removed or broken.

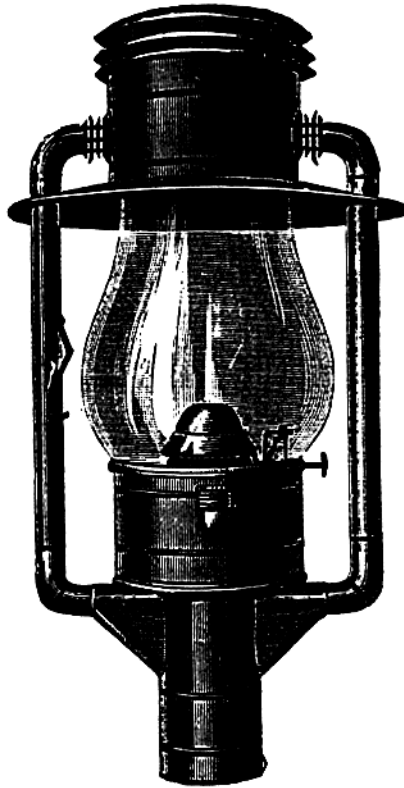

It has our new corrugated reflector with Dash Board Spring, hence can be used as a Dash Board Lamp, hung on a nail for use as a side Lamp, or carried by the bail as an ordinary Lantern, in fact can be used in a greater variety of ways than any other Lamp or Lantern yet offered the trade.

Cannot be extinguished by the wind.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed in cases of one dozen and half dozen each.

DOMINION TUBULAR LAMP COMPANY.

No. 3 Globe Tubular Street Lamp, with
Automatic Extinguisher.

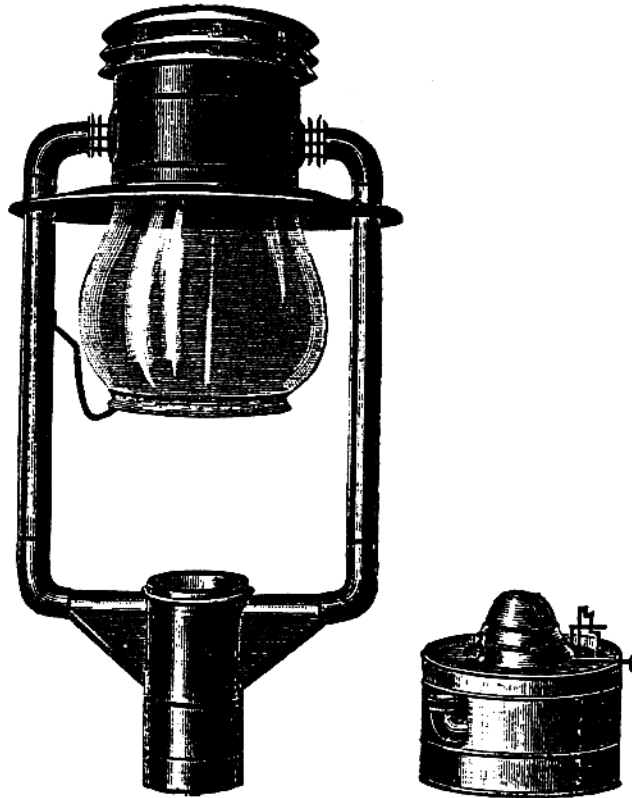

No. 3 Burner, 1½ inch Wick, Height of Lamp 25 inches.

We invite your special attention to our No. 3 Globe Tubular Street Lamp, constructed on the Genuine Tubular Principle, which renders perfect combustion, hence a MORE brilliant light than the ordinary Street Gas Light, emits no smoke, and cannot be blown out by the strongest wind.

Every Lamp has our Automatic Extinguisher that can be set to extinguish the flame in eight, twelve, or sixteen hours, thereby effecting a great saving.

To ensure a perfect light, it is necessary to keep the sieve of your Burner thoroughly clean, and at least twice a month, employ the bullet contained beneath

DOMINION TUBULAR LAMP COMPANY.

No. 3 Globe Tubular Street Lamp with Automatic Extinguisher.

SHOWING GLOBE RAISED AND HELD IN POSITION, AND OIL FOUNT DETACHED

the brass cap in running the entire length of the air tubes, freeing them from cobwebs or any other obstructions to draught. From the peculiar construction of these Lamps, having outside cold air injectors at the top of the tubes, they are not effected by temperature, and will burn equally as well in cold as in warm weather.

They have a fourteen inch enameled reflector at the top of the globe, which throws the light downward, greatly increasing its brilliancy.

We furnish duplicates to any parts as ordered.

Can be filled, lighted, regulated and extinguished without removing the globe.

Packed one in a box.

DOMINION TUBULAR LAMP COMPANY.

No. 17 Tubular Side Lamp,

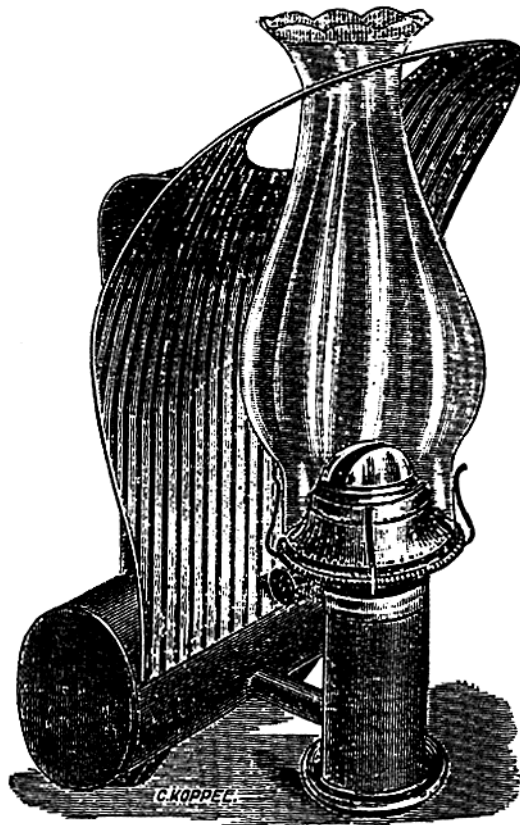

**No. 2 Burner, 1 inch Wick. No. 1 Globe and 6 inch Silvered
Glass Reflector.**

This Lamp is made upon the genuine tubular principle. It has an extra large oil pot, also our spring plate attachment for easy lighting ; has a No. 2 burner, with 1 inch wick, and is furnished with a 6 inch silvered glass reflector, consequently gives a brilliant and powerful light, without smoking. It is particularly adapted to lighting Halls, Factories, vessels &c., and not being effected by currents of air, is equally well adapted for out or in-door uses.

We furnish Duplicate Burners, Globes and Reflectors as ordered.

It can be filled, lighted, regulated, and extinguished without removing the globe.

Packed in cases of one dozen and half-dozen each.

DOMINION TUBULAR LAMP COMPANY.

No. 12 Reflector Side Lamp,

WITH No. 2 COLLAR.

The above illustrates our No. 12 Reflector Side Lamp which is furnished with an extra large oil tank, with a capacity for burning twenty consecutive hours without refilling. The reflector being corrugated presents a large, handsome reflecting surface and from the peculiar shape it not only throws the light to the front and sides but downwards as well.

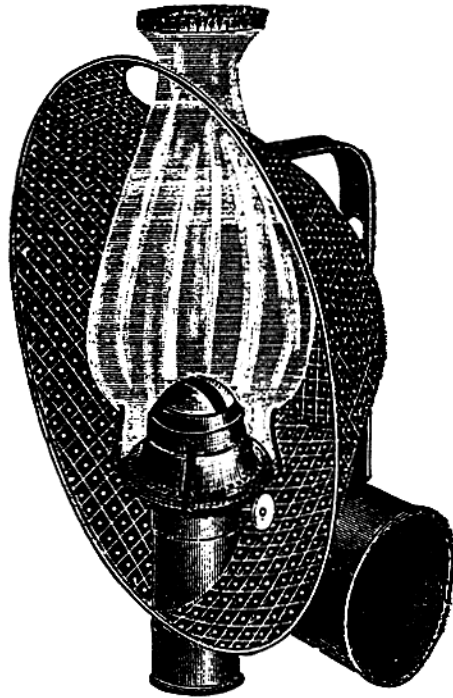

The back is so arranged that it can be used as a side Lamp or carried in the hand.

We furnish them with burners when so ordered.

Filled, regulated and extinguished without removing the chimney.

Packed in cases of one dozen each.

DOMINION TUBULAR LAMP COMPANY.

Hood Reflector Side Lamp

- No. 14 with "1" Collar and 10 inch Corrugated Reflector.
 No. 16 " "2" " " 11 " " "
 No. 18 " "2" " " 12 " " "

In the peculiar construction of these Lamps we have attained a long desired result, that of allowing the large corrugated reflector to completely encircle the flame, thereby securing a reflecting power more than double that of any other reflector of its kind.

The oil tank has a capacity for burning twenty hours without refilling.

We furnish them with burners when so ordered.

Can be filled, regulated and extinguished without removing the chimney.

Packed in cases of one dozen each.

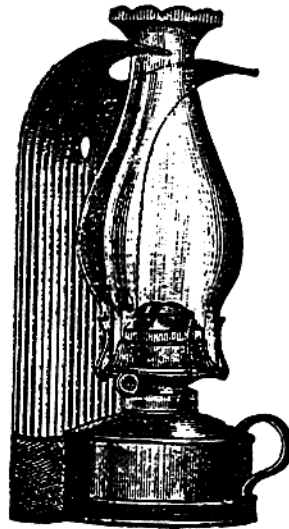

DOMINION TUBULAR LAMP COMPANY.

Iron Bracket for Street Lamp.

TWO FEET LONG.

Can be fitted to any Street Lamp Socket.

No. 10 Reflector Side and Hand Lamp,

With match Safes attached. No. 2 Collar.

This Lamp is equally well adapted for a hand or side Lamp.

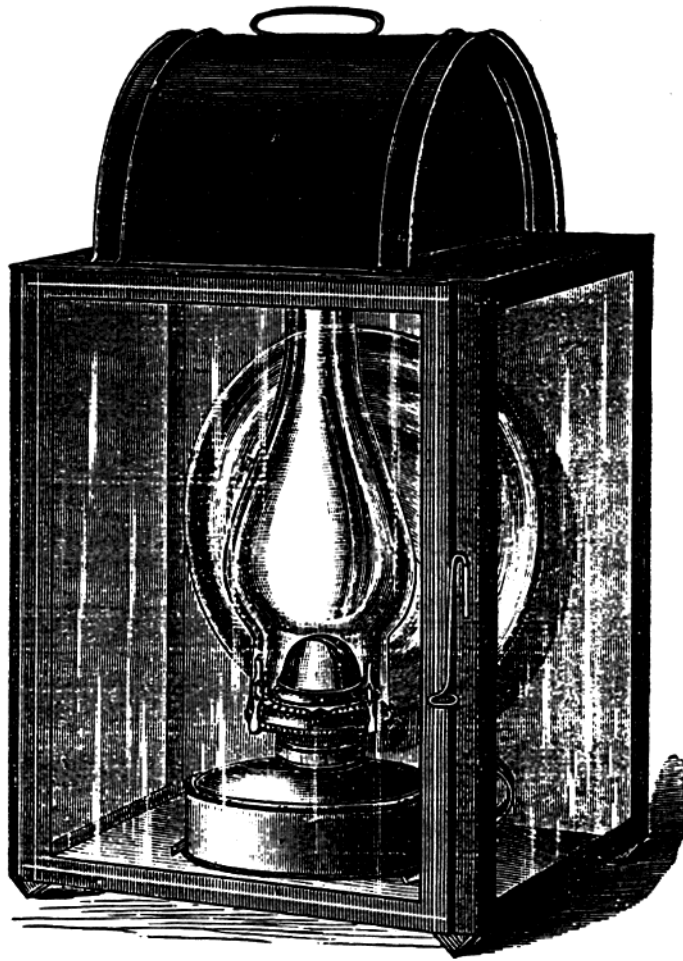

The back of the bracket which holds the lamp is a corrugated reflecting surface which is the most brilliant of its kind and being arched at the top throws the light downward as well as forward. It has also attached to each side a match safe, furnished with rough surfaces for lighting the match.

The lamp can be instantly removed from the bracket and carried at will.

Is finished in blue japan and presents an attractive appearance.

Packed in cases of one dozen each.

DOMINION TUBULAR LAMP COMPANY.
